

# E2 Dual

The MagicSing E-2 karaoke device brings families and friends together for a memorable time. With over 20 years of experience in making karaoke systems, EnterMedia has developed one of the most advanced karaoke systems in the world. With its intuitive user-friendly interface and simple design, users can easily customize melody, tone, echo, tempo, and other functions to produce the best singing experience.

The MagicSing E-2 can display musical notes onto the TV while the music continues to play. Users also have the option to further customize their background display by inserting a USB or SD card port. Even a wired third microphone is available for sale so you can sing with up to three people at the same time.
